J.W. SPEAKER BRINGS SCIENCE & DESIGN TOGETHER.

We view vehicle lighting from the perspective that matters most — Yours. Our engineers advance the science of light further each day to improve your safety. Our designers make vehicles look more beautiful from every point of view. You only get this unique mix of **science & design** from authentic J.W. Speaker products.

DRIVEN. TO SEE MORE.

We recognize that in order to be the best, we must remain focused on developing innovative and high-quality vehicle lighting solutions that are second to none. We understand the need to constantly explore new and emerging technologies with the goal of providing better performance for our OEM and aftermarket customers.

A LEGACY OF INNOVATION OEM ORIGINS AND AFTERMARKET ADVANCEMENT

A lot has changed since J.W. Speaker became the leader in LED lighting technology. Vehicles are sleeker. Lights are brighter. And the world seems both larger — yet smaller — than ever before.

But some things remain the same. J.W. Speaker continues its commitment to innovative LED lighting systems. Established in scientific principles and revolutionary design — we're continuously striving for the next great discovery. We're still excited with every new product launch. We're still compelled to impress every customer. And we're still driven to see more.

We understand what's most important; J.W. Speaker engineers and designers transform the science of light into tangible real-world LED solutions to enhance every driving experience and keep you safer on the road. Because we manage everything — from conception to production — we can meet your exacting demands for performance, as well as our own for perfection.

- 1935 John W. Speaker founded the J.W. Speaker Corporation
- 1942 Designed and patented the iconic P-38 GI can openers
- 1951 Tools their first vehicle lighting products
- 1964 First company to use chrome-plated ABS for snowmobile headlight bezel
- 1971 Introduces all-plastic clearance & marker lights with snap-fit lenses
- 1982 First production of custom-designed light bar for Ariens
- 2002 First LED headlight prototype developed
- 2011 Patent granted for first digital LED swiveling headlight
- 2012 Entered aftermarket with the first of its kind 7" round LED headlight for Jeeps
- 2015 Launched the world's first Adaptive® Headlight
- 2017 Launched SmartHeat® technology
- 2019 Released EVO J3™ headlight and Trail 6™ off-road light
- 2020 Released 9600 Peterbilt POD LED headlight
- 2022 Released Model 93 5-in-1 90mm headlights

SURPASSING STANDARDS WORLDWIDE.

J.W. Speaker is committed to making the best products to be used legally on-road around the world. To do that, we design lights that meet and exceed the requirements for a variety of regulations:

The Federal Motor Vehicle Safety Standard regulates all automotive lighting, signaling, and reflective devices in the U.S.A. and is enforced by the Department of Transportation (**DOT**)

Many countries recognize the United Nations Economic Commission for Europe (**ECE**) Transport Division's regulations and mirror the ECE regulations in their own national requirements

SAE International develops standards for the engineering of powered vehicles mainly in the U.S.A. and Canada, including cars, trucks, boats, aircraft, and more

Transport Canada is responsible for developing regulations, policies, and services relating to transportation in Canada

The Australian Design Rules (**ADR**) are national standards for vehicle safety, anti-theft, and emissions

KEY TERMS

Daytime Running Light (DRL): Headlights that include DRL in their design will automatically switch on the daytime running light when the vehicle is moving forward, emitting a white light to increase the visibility of the vehicle during daylight conditions.

Front Position (FP): This part of a headlight provides added visibility of your vehicle to other drivers, particularly helpful for nighttime visibility while parked.

Left Hand Traffic (LHT): referring to which side of the road a driver uses. For instance, a driver in the UK is Left Hand Traffic and would use two LHT lights.

Right Hand Traffic (RHT): referring to which side of the road a driver uses. For instance, a driver in Canada is Right Hand Traffic would use two RHT lights.

RAW LUMENS:

A measure of the **theoretical** output of a light

Calculated by multiplying the manufacturer's lumen rating for the LED by the number of LEDs in the finished light

Does not represent the actual light output as it doesn't account for thermal, assembly and optical losses that impact all lights

Example Calculation:

LED is rated at 100 Lumens
8 LEDs in the finished light
100 x 8 = 800 Raw Lumens

EFFECTIVE LUMENS:

A measure of the **actual** output of a light

Measured using a photometric testing device for an exact measurement of a finished light for an accurate value of light output

Represents the actual light output of the finished light after thermal, assembly and optical losses

Example Measurement:

Raw Lumens = 800
Losses = ~40% of Raw Lumens (800 x .4 = 320)
800 - 320 = 480 Effective Lumens

J.W. Speaker uses photometric testing devices and optical engineers to measure the Effective Lumens of our products to give you accurate light output values.

BEAM PATTERNS

Each light pattern is designed and tested by optical engineers to give you the best possible beam pattern to drive behind.

Below are examples of the common beam patterns.

Our engineers design each product to project light in the areas you need it **and** comply with the legal requirements for on-road use in the countries the product is intended to be used in.

Low Beam RHT (.75m high at 0')

Illuminates across the road and ahead of the vehicle, with a cutoff to prevent glare for oncoming traffic

High Beam (.75m high at 0')

Bright light for distance illumination above and below the horizon, when not following or passing vehicles

Fog Beam (.5m high at 0')

Short and wide pattern to illuminate area just above the ground & in front of the vehicle

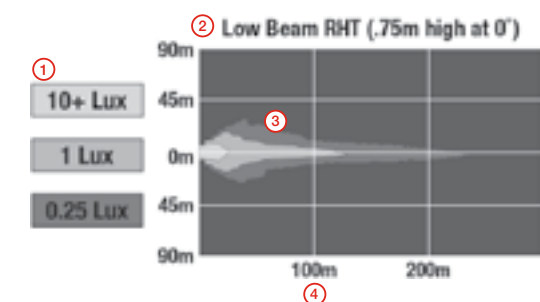

PARTS OF A LIGHT DIAGRAM

Lux Key¹: Intensity of the light measured

Title²: The type of beam pattern, and the height and angle of the light when it was measured

Light Pattern³: A "bird's eye view" showing the shape, intensity, and distance

Distance Markers⁴: Reference in meters (m) for the size and distance of the light pattern

Measured in degrees Kelvin, color temperature describes how cool or warm the light emitted by a source is. Any object will emit light if it is heated to a high enough temperature. The color of the light will change in a predictable way as the temperature increases, shown on the Kelvin Scale.

Warm: 0 to 3,000K

Used in living spaces or retail stores
Similar to the rising and setting sun
Can fatigue eyes and make people feel tired

Neutral White: 3,500 to 4,900K

Used in bathrooms, offices, classrooms & malls
Clean and neutral lighting that is inviting
Promotes efficiency and similar to daylight

Cool: 5,000-7,000K

Used in hospitals, manufacturing, & construction areas
Promotes alertness and attention to detail
Mimics daylight and makes people feel more awake

Color temperature does not measure or indicate the physical heat coming from a light source.

J.W. Speaker uses LEDs and designs lights with a color temperature of 5,000K to give drivers crisp, white light for the best visibility, and to promote alertness and safety.

IP RATINGS

The Ingress Protection (IP) Code outlines a system of classification for the protection of electrical enclosures against the intrusion of foreign bodies like tools, fingers, dust, and moisture. The system of classification was specified by the International Electrotechnical Commission and is officially designated as IEC 60529.

FIRST # - DEGREE OF INGRESS PROTECTION

The degree of protection against contact with moving parts and the degree that the equipment is protected against solid foreign bodies intruding into an enclosure.

IP #	DESCRIPTION
0	No protection provided.
1	Protection against entry of objects larger than 50 square mm.
2	Protection against entry of objects larger than 12 square mm.
3	Protection against entry of objects larger than 2.5 square mm.
4	Protection against entry of objects larger than 1.0 square mm.
5	Protection against entry of dust in sufficient quantity to prevent satisfactory operation.
6	Complete protection against entry dust.

SECOND # - DEGREE OF MOISTURE PROTECTION

The degree of protection for the equipment inside the enclosure against the harmful entry of various forms of moisture (e.g. dripping, spraying, submersion, etc.)

IP #	DESCRIPTION
0	No protection provided.
1	Protection against drops of water falling vertically.
2	Protection against drops of water falling vertically when the light assembly is tilted up to 15 degrees from its normal position.
3	Protection from entry of water spray from angle of up to 60 degrees from vertical.
4	Protection from entry of water splashes or spray from any direction.
5	Protection from a low pressure jet of water in any direction.
6	Protection against heavy seas or a strong jet of water in any direction.
7	Protection against immersion up to 1 meter.
8	Protection against submersion over 1 meter.
9K	Protection against high pressure cleaning

Please utilize the Icon Guide as a reference to see which market(s) apply to our products. If a product has a market application icon, it fits one or more vehicles within that market. To view the full list of applications for every product, please visit the corresponding model page on our website.

TRAIL 6 AMBER/WHITE

Ultimate visibility for maximum safety.

J.W. Speaker's Trail 6 Amber/White™ allows for better safety and visibility with bright white or amber LEDs. Illuminate the work site with brilliant white light, or cut through dust and fog with amber LEDs to see every potential hazard. Easily mount on any vehicle with the Trail 6 Amber/White™ custom lighting system with over 1,300 Effective Lumens of bright light.

Total control and customization.

You need reliable, bright lights that work as hard as you do. This compact, durable work light offers total LED color control with two wire and three wire install options to match any vehicle's needs. The Trail 6 Amber/White™ is compact, powerful, easy to mount on any vehicle as a bracket, hanging, or panel mount for a custom lighting system.

TRAIL 6 AMBER/WHITE

777 GEN 2

Start Preventing Accidents

The Model 777 GEN 2 offers a unique “keep out zone” safety light in a sleek and practical design. This LED safety light is designed with various types of safety applications in mind, including forklifts, work trucks, construction vehicles, farm equipment, and more. They are available in three different color configurations (Red, Green, and Blue) to create the best solution for each industry and application.

J.W. Speaker offers a safety lighting package, designed to help both your operators as well as your workforce on the floor, adding safety precautions and visibility. For a 360° safety solution, mount one in the front and one in the back. It can be combined with linear safety light as well.

Don't trust an inferior light – it could cost you in the end. Model 777 GEN 2 is a reliable universal safety light that can be used in a variety of different applications. It creates a safety zone that is highly visible to keep employees and pedestrians away from moving vehicles. This is the safety solution you have been looking for!

SMARTHEAT[®]

Products featured: Model 234 Flash, Models 274, 234, and 670 XD, and Models 8800 High and Low Beam and 8801 Low Beam

EXPERIENCE THE FUTURE OF SAFER WINTER DRIVING.

HEADLIGHTS

SNOW PLOW LIGHTS

WORK LIGHTS

TAIL LIGHTS

DON'T LET SNOW AND ICE SLOW YOU DOWN.

The SmartHeat[®] Series provide a complete solution for outfitting over-the-road trucks, snow plows, refuse trucks, construction equipment, delivery vans and any heavy-duty vehicle that needs to operate in the winter, covering forward and rear lighting, as well as task lighting. It's the industry's most comprehensive heated LED lighting line-up.

The technology behind SmartHeat[®] enables widespread use of brighter, whiter, long-lasting LED lighting all winter long and is designed to use less power than halogen lighting systems for a more efficient result. This helps owner-operators and fleets improve their utilization and productivity while enhancing the ability to see and be seen on the road, thus ensuring safety and comfort.

Learn more at www.jwspeaker.com/world-of-smarheat/

HOW IT WORKS

SmartHeat[®] Technology will automatically turn on at startup or when temperatures drop.

The SmartHeat[®] technology uses an internal sensor to sense the current temperature.

If the technology senses the temperature to be below the low temperature threshold, the heat will stay on to de-ice the lens.

If the technology senses the temperature to be above the high temperature threshold, the SmartHeat grid system will automatically turn off. This keeps the lamp from overheating when facing warmer conditions.

		Light Temperature		
Air Temperature		ON	ON	OFF
		ON	OFF	OFF
		N/A	OFF	OFF

Escape the standard.

Introducing the latest technology in lighting for Jeep® Wranglers. The EVO J3™ is the first street-legal, plug & play Jeep headlight with a built-in turn signal. Powerful LEDs and carefully engineered light patterns give you the best performance and design available whether on the road or exploring off-road.

Light your adventure all year round.

The heated version of the EVO J3™ features SmartHeat® technology to de-ice lenses for the best safety and visibility.

Customization & control at your fingertips.

Unlock more control and features in the EVO J3™ using the new J-Link™ mobile app. Customize your startup sequence, access the Off-Road Mode and lead the trail with Guide Mode.

EVO J3™

RH Terminal - AMP (#172796-1)

Operating Voltage:
9-32V DC

Current Draw:
Heated: 3.30A @ 12V DC; 1.67A @ 24V DC
Non-Heated: 2.10A @ 12V DC; 1.00A @ 24V DC

Retrofit Information:
4" x 6" Rectangle; 1A1 and 2A1 Sealed Beams

Standards & Application:

Product Specifications

Raw Lumen Output:
3,015 (High Beam); 2,250 (Low Beam)

Effective Lumen Output:
1,320 (High Beam); 975 (Low Beam)

Connector/Wiring:
H4

Mating Connector:
H4 AMP#172615-2

Operating Voltage:
10-32V DC

Current Draw:
High Beam: 5.35A @ 12V DC; 2.50A @ 24V DC
Low Beam: 4.30A @ 12V DC; 2.10A @ 24V DC
Front Position: 2.80A @ 12V DC; 1.32A @ 24V DC

Retrofit Information:
5" x 7" Rectangle; 2B1 Sealed Beams

Standards & Applications:

9600 POD

Look Forward. Shine Brighter.

Rediscover the beauty of your Peterbilt truck in a new way. The Model 9600 Peterbilt POD LED Headlight is expertly engineered with outstanding durability, stunning performance, and superior visibility. The iconic plug and play POD light design delivers an innovative style to complement and enhance Peterbilt 388/389 & 567 trucks.

This 5-in-1 headlight uses a unique “blade” design to integrate turn signal performance and front position optics while using Bi-LED technology to digitally switch between high and low beam. Complete with optional SmartHeat® technology, the Model 9600 is designed to automatically remove ice and snow from the lens, giving Peterbilt drivers better visibility in treacherous winter conditions.

PRODUCT SPECIFICATIONS

Raw Lumen Output:

2,895 (High Beam); 1,200 (Low Beam)

Effective Lumen Output:

1,020 (High Beam); 6,14 (Low Beam)

Candela Output:

50,400 (High Beam); 26,690 (Low Beam)

Connector/Wiring:

Deutsch DT04-8PA

Mating Connector:

Deutsch DT06-8SA

Operating Voltage:

9-18V DC

Current Draw:

High Beam: 4.2A @ 12V DC

Low Beam: 2.1A @ 12V DC

Turn: 2.15A @ 12V DC

Side Marker/Parking: 0.34A @ 12V DC

DOT/SAE

SINGLE SIGNAL LIGHT

PART #	DESCRIPTION
0347951	12-24V DOT/SAE LED Stop & Tail Light & Red Lens
0347961	12-24V ECE LED Stop, Tail, Turn, Fog & Backup Light & Clear Lens

▲ **WARNING:** Cancer and Reproductive Harm - www.P65Warnings.ca.gov
 ▲ **AVERTISSEMENT:** Cancer et effet nocif sur la reproduction - www.P65Warnings.ca.gov

PART #	ACCESSORIES
8200921	Pedestal Mount for Model 260 SAE and 905
8200931	Panel Mount for Model 260 SAE and 905
8201051	Pedestal Mount for Model 260 ECE
8201061	Panel Mount for Model 260 ECE

Product Specifications

Connector/Wiring:
6-Pin Deutsch Socket (DT04-6P-E004);
Others available

Mating Connector:
6-Pin Deutsch Plug (DT06-6S); Others Available

Input Voltage:
12-24V DC

Current Draw:
Stop: 0.115A @ 12V DC; 0.075A @ 24V DC
Tail: 0.010A @ 12V DC; 0.010A @ 24V DC
Turn: 0.115A @ 12V DC; 0.080A @ 24V DC
Reverse: 0.045A @ 12V DC; 0.028A @ 24V DC

SINGLE SIGNAL LIGHT

PART #	DESCRIPTION
0342421	12-24V ECE/SAE LED Stop, Tail, Turn Signal & Backup

▲ **WARNING:** Cancer and Reproductive Harm - www.P65Warnings.ca.gov
 ▲ **AVERTISSEMENT:** Cancer et effet nocif sur la reproduction - www.P65Warnings.ca.gov

Product Specifications

Connector/Wiring:
Integrated 4-Pin Deutsch Socket (DT04-4P)

Mating Connector:
4-Pin Deutsch Plug (DT06-4S)

Input Voltage:
12-24V DC

Current Draw:
Stop: 0.375A @ 12V; 0.250A @ 24V DC
Tail: 0.075A @ 12V; 0.05A @ 24V DC
Turn: 0.450A @ 12V; 0.325A @ 24V DC

SINGLE SIGNAL LIGHT

WHITE REVERSE

AMBER REAR & TURN or FRONT POSITION & TURN

Be Seen From Every Side.

Your brake, turn, and hazard lights are critical visual signals to drivers on the road. Powerful and long-lasting LEDs in the Model 274 signal lights give you confidence that your truck or trailer is clear of snow and ice and visible to other drivers. Ten different versions to add SmartHeat® technology to every side of your vehicle or trailer. DOT-compliant for legal on-road use when mounted vertically or horizontally. First-of-its kind heated turn, positions, stop, and strobe lights!

Safety from all sides.

Model 274 Flash provides 3 different flash modes, an exclusive SmartSync™ system to put lamps in simultaneous or alternating flash pattern. 2-in-1 dual function strobe and turn with turn override wire.

PRODUCT SPECIFICATIONS

Connector/Wiring:

Flash: 6-Pin Delphi (#12052848)

Mating Connector:

Stop/Tail/Turn, Reverse, & FP: 3-Pin AMP Connector (282087-1)

Flash: 6-Pin Delphi (#12052848)

Operating Voltage:

Stop/Tail/Turn, Reverse, & FP: 12-24V DC

Flash: 9-32V DC

Current Draw*:

Stop/Tail/Turn: 0.15A @ 12V DC; 0.15A @ 24V DC

White Reverse: 0.85A @ 12V DC; 0.85A @ 24V DC

Flash: 1.20A @ 12V DC; 0.70A @ 24V DC

* For the full listing of Current Draws, please visit the respective Product Number's Specification Sheet on our website at www.jwspeaker.com

OEM

Technology is constantly evolving. Our attitude towards design remains constant. Relentless innovation and smart partnerships make J.W. Speaker the reliable partner who invests in the design and science of vehicle lighting.

AFTERMARKET

Look good or drive safely. That's often your choice with Aftermarket lights, but J.W. Speaker does not compromise. Our engineers and designers don't cut corners. The result is power and beauty that makes you feel good about the look of your vehicle — and your safety.

Family owned and operated since 1935.
We proudly designed and engineer the best LED
lighting products, all in Germantown, WI, U.S.A.
